proximity/smart cards <u>dont</u> provide <u>authentication</u>

pulping <u>data</u> can be done by shredding and mixing in water solution

<mark>Drones</mark> can be purchased/out-sourced and cover large area

CCTV for <u>large area</u> not cost efficient

Most reliable proof of person's <u>location</u> and <u>activities</u>

Cameras

DMZ for public and public use

ad hoc zone — when 2 or more wireless devices connect to each other creating on-demand network

guest network — for non-employees limit to certain functions

wireless topology — used to extend wired local area network through antenna

pulverizing uses mechanical shredders

Optical media = shredding

storage media = burning

optical media is <u>not</u> magnetic
